Required tools (User Supplied):

Phillips Head Screwdriver

**WARNING:** The rack enclosure is extremely heavy. Do not attempt to unpack, move, assemble or install the enclosure without assistance. Until it has been properly assembled and stabilized, the enclosure is prone to tipping and could cause property damage and/or personal injury. Use extreme caution when assembling the enclosure. Do not attempt to install equipment without first stabilizing the enclosure.

## step

1

Remove front and rear doors.

## step

2

For front doors, attach additional hinge brackets to door frame on the same side as the existing hinge brackets.

2

4

For rear doors, move two hinge brackets so that all brackets are on the same side of the door frame.

step

3

Attach colo doors  
to hinges on frame.

4

Repeat step 3 for  
rear doors.

step

4

Assemble divider  
plate brackets  
onto divider plate.  
There are left and  
right brackets.  
Make sure the  
flat surface of the  
brackets face away  
from each other  
when assembled to  
divider plate.

1

4

## step

# 5

Using an assistant, install divider. Divider should be installed with lower doors installed and completely closed so divider can rest on the lower doors while installing M6 washers and screws. Lock the doors to prevent them from opening and damaging the divider. Brackets on divider should be on the inside of the rack vertical rails.

1

## step

# 6

Install upper M6 washers and screws in the topmost hole of "U" number 22 for a 42U rack and "U" number 25 for a 48U rack. DO NOT open lower doors until four of these washers and screws are installed onto the four vertical rails.

4

4

step

7

Once upper M6 hardware is installed, the bottom doors can safely be opened to install the lower M6 hardware.

8

8

step

8

2

4

2

step

9

2

Install cable channels onto the cable managers using the tabs.

step

10

4

step

11

If you only put in one cable channel, install the blocking plate on the side opposite the cable channel. Secure the plate to the divider.

1

2

step

12

Install roof. No fasteners are needed.

1

step

13

Place provided label over existing model number label.
