Equipment Connection

Plug your equipment into the Power Strip's AC receptacles. DO NOT plug in equipment that draws more total amps than your Power Strip's amperage rating (see label on Power Strip for amperage rating), or you will trip the circuit breaker. If the circuit breaker trips, remove overload and depress breaker to reset. Leave enough clearance at the end of the Power Strip to allow the circuit breaker to operate normally.

Note: Select models with a power switch feature a protective switch cover. To access the switch, flip open the attached cover.
